PwC Digital Strategy

Mapping the Client Q&A to Stakeholders

Interview 09 questions and answers mapped to stakeholders S1 to S8 | Project Meridian | 31 October 2026

1. Basis

This document maps the eight open questions for the client, and the answers given in Interview 09, to the stakeholder list (S1 to S8). The document maps responses of Stakeholders to follow-up questions

"Primary" means the stakeholder whose area the question mainly settles. "Linked statements" are statement register IDs (ST-xx) or interview numbers (Int-xx) showing why each stakeholder is relevant.

2. Stakeholder list

ID	Stakeholder	Healthcare acquisition lens
S1	Chief Strategy Officer	Market entry rationale, strategic fit, alternatives and success measures
S2	Healthcare Commercial / Market Access Director	Demand, competitors, payer/provider purchasing, reimbursement or tender barriers
S3	Chief Medical Officer / Clinical & Product Quality Lead	Clinical value, patient safety, outcomes, complaints, product/service evidence
S4	Regulatory & Healthcare Compliance Director	Licences, approvals, inspections, quality findings, promotion and compliance exposure
S5	CIO / Health Data & Cybersecurity Lead	Health-data governance, interoperability, cyber risk and technology integration
S6	CFO / Healthcare Deal Finance Lead	Revenue quality, payer/customer mix, reimbursement, working capital, valuation and downside
S7	COO / Supply Chain & Service Delivery Lead	Capacity, critical suppliers, product availability/service continuity and operating readiness
S8	Country / Regional Market Lead	Local market access, customer trust, local competitors, talent and execution constraints

3. Question and answer to stakeholder

#	Open question	What the client answered (fictional)	Primary stakeholders	Supporting stakeholders	Linked statements	Why they are relevant
Q1	Scope: target, business model, countries, products	Connected devices plus a cloud monitoring platform; one current market (A), one under consideration (B). The regulatory pathway for B and whether the platform is sold separately are not confirmed.	S4 Regulatory, S2 Commercial, S1 Strategy	S3, S5, S6, S7, S8	ST-06 (S2), ST-16 (S4), Int-04 (S4), Int-02 (S2), Int-06 (S6)	S4 needs the product and country list to map approvals. S2 needs the model to map the buying decision chain. Others said their evidence needs depend on the target.

#	Open question	What the client answered (fictional)	Primary stakeholders	Supporting stakeholders	Linked statements	Why they are relevant
Q2	What management has provided and what is verified	A presentation, summary financials and a regulatory overview received. Nothing independently verified.	S6 CFO, S4 Regulatory, S3 Quality, S5 CIO	S1, S2, S7	Int-01 (S1), ST-17 (S4), ST-28 (S6), ST-14 (S3), ST-23 (S5)	Each of these stakeholders asked for original records instead of management claims. The answer shows none of that evidence exists yet.
Q3	Investment thresholds and gate ownership	Board has not approved thresholds. Executive committee expected to decide. CMO, Regulatory Director and CFO expected to escalate or own gates. Effect of escalation not decided.	S6 CFO, S1 Strategy, S3 Quality, S4 Regulatory	S7	ST-04 (S1), ST-15 (S3), ST-20 (S4), ST-31 (S6)	These four stakeholders each stated their own trigger or gate. S6 said thresholds must come from the client.
Q4	Partnership or organic entry alternatives	Both still open. One informal conversation about a local distributor. No comparison criteria or timelines.	S1 Strategy	S2, S8, S4	ST-01b, ST-05 (S1), ST-19 (S4)	S1 is the only one who raised alternatives. S2 and S8 can judge local routes. S4 can supply approval timelines for each route.
Q5	Systems, data and AI plans	Interest in platform data and possible AI, but no plan. Data rights, storage and cross-border flow unknown. Integration decision undecided, led by CIO.	S5 CIO	S3, S6, S2	ST-21, ST-22, ST-25, ST-26 (S5); Int-02 (S2)	S5 asked for system and data-flow inventories and treats AI as a hypothesis. S3 is relevant if systems support clinical decisions. S6 is relevant for technology costs. S2 noted data-protection teams can block implementation.
Q6	Integration approach and stop authority	No integration plan. A preference for minimal early change, untested. Stop authority undefined.	S7 COO	S3, S5, S1, S6	ST-35, ST-36 (S7), ST-13 (S3), ST-24 (S5)	S7 asked for stop authority and a Day 1 package. S3 and S5 warned that change can disrupt continuity and records. S1's speed emphasis should be tested against this. S6 lists integration costs.
Q7	Access to customers, partners and reviewers	Customer contact not permitted yet. Independent reviewers once the data room opens. Local partners possibly via a restricted team. Own-market views not to be treated as target evidence.	S8 Country Lead	S2, S3, S4	ST-40 (S8), ST-08 (S2), ST-15 (S3), ST-18 (S4)	S8 and S2 want customer and partner evidence. S3 asked for an independent quality review. S4 asked for legal specialists to determine applicable rules.
Q8	Decision date and evidence required	Decision planned for the end of next quarter, not fixed. Committee wants verified and unverified items flagged.	S1 Strategy, S6 CFO	S4, S3, S5	ST-05 (S1), ST-31 (S6), ST-19 (S4)	S1 asked for what is known, claimed and untested to be shown separately. S6 said unvalidated assumptions may make the recommendation conditional. S4 said approval time affects launch dates.

4. Stakeholder to questions

Stakeholder	Questions	Open item the client answers leave for them
S1 Chief Strategy Officer	Q1, Q3, Q4, Q8	Comparison criteria for acquisition, partnership and organic entry; the evidence the committee will see.
S2 Commercial / Market Access Director	Q1, Q4, Q7	The buying decision chain; whether the platform is sold separately; access to customer references.
S3 CMO / Clinical & Product Quality Lead	Q2, Q3, Q6, Q7	Quality and safety records not yet provided; whether CMO escalation stops the process; independent review timing.
S4 Regulatory & Compliance Director	Q1, Q2, Q3, Q7, Q8	Regulatory pathway for Market B unconfirmed; inspection and licence records not yet provided; legal specialist input.
S5 CIO / Health Data & Cybersecurity Lead	Q2, Q5, Q6	No system or data-flow documentation; data rights unknown; integrate-or-separate decision open.

Stakeholder	Questions	Open item the client answers leave for them
S6 CFO / Deal Finance Lead	Q2, Q3, Q8	No approved thresholds; financials unverified; downside case not yet built.
S7 COO / Supply Chain & Service Delivery Lead	Q6	No integration plan, no defined stop authority; no Day 1 package.
S8 Country / Regional Market Lead	Q1, Q4, Q7	Customer and partner access is restricted; route to adoption in Market B untested.

5. Reading the mapping

- **Most open items sit with S4 and S6.** This shows where the client's answers leave the most unresolved, not which area matters most.
- **S7 maps to only one question.** The client questions were not designed around operations, so this does not mean supply and service continuity is a lesser concern. Consider adding a continuity question for the client.
- **Q3 names only three gate owners.** The client named the CMO, Regulatory Director and CFO. S1 and S4's stated triggers are not matched to a named owner in the answers, so that needs confirming.
- **All client answers are fictional.** They do not validate any stakeholder claim. They only show where the process stands.
